Professional Summary

Motivated and detail oriented final-year Business Information Systems student at Malawi Assemblies of God University, seeking an IT Internship. I possess a strong technical foundation built through a Level 2 IVQ Diploma in IT Systems Support and extensive training in networking and security. I am eager to apply my practical skills in systems administration, network configuration, and project development to contribute to your team's technical success.

Education

Bachelor of Business Information Systems

Malawi Assemblies of God University | *Graduating 2026*

Level 2 IVQ Diploma in IT Systems Support

Malawi Polytechnic Continuing Education Centre | *Awarded 2021*

Technical Certifications

Cisco Networking Academy

- **CCNAv7: Enterprise Networking, Security, and Automation** (Mar 2022)
 - Proficient in OSPFv2, Access Control Lists, NAT services, and network optimization.
- **CCNAv7: Switching, Routing, and Wireless Essentials** (Nov 2021)
 - Experienced in configuring VLANs, EtherChannel, Inter-VLAN routing, and WLC security.
- **CCNAv7: Introduction to Networks** (Jul 2021)
 - Skilled in configuring switches, routers, and end devices; creating IPv4/IPv6 schemes; and troubleshooting small networks.

Technical Skills

- **Networking & Administration:** GNS3 and CISCO packet tracer network topology design, Alpine Linux node configuration, Cumulus VX switches, cisco switches and routers, SNMP services, DNS server configuration with DHCP support configuration.
- **Software & Web Development:** React Native, Flutter, Expo, Responsive CSS design, HTML, project management application development.
- **Hardware/Software Support:** System troubleshooting, hardware maintenance, and software installation.

Relevant Projects

ProjectBook: Mobile Management Application

- Developed a mobile desktop project management tool using React Native, Firebase, Cloudinary, and EmailJS to streamline organizational workflows.

Key Competencies

- **Problem-Solving:** Ability to troubleshoot hardware and software issues effectively.
- **Project Management:** Experienced in the full production lifecycle, from requirements documentation to system deployment.
- **Collaboration:** Adept at working independently or as part of a team to achieve technical objectives.
- **Adaptability:** Quick to learn new technologies and apply academic knowledge to real-world infrastructure challenges.
- Network Design and Implementation
- Network Security and Threat Mitigation
- Troubleshooting and Problem Solving
- Network Monitoring and Optimization
- Team Collaboration
- Technical Documentation
- Continuous Learning and Adaptation
